

## SAFETY, HEALTH & ENVIRONMENTAL MISSION STATEMENT

Colonna's Shipyard requires an unwavering commitment to safety as it is the foundation of everything we do. We pledge to protect the lives, health, and well-being of every individual who enters our shipyard or works on our projects, as well as the environment that sustains us. This means eliminating hazards before they cause harm, maintaining compliance with federal, state, and local regulations, and going beyond minimum standards to implement best-in-class safety practices and environmental stewardship.

Every employee is obligated and empowered to act—to stop work when conditions are unsafe, to speak up without hesitation, and to champion a culture where questions and concerns lead to solutions, not silence.

Safety is not a department—it is a shared responsibility inherent in every task, every decision, and every interaction. Through continuous training, open communication, and proactive risk management, we make certain that every person returns home safe, healthy, and proud of their contribution to the customer and their Colonna's family.
